INS-301 OUTLINE SNAPSHOT · JULY 12, 2026

Reference copy of the founder's Google Doc; source of truth remains the Doc; defects preserved verbatim | HGF Management

Snapshot of the founder's Google Doc "INS-301 Participating Public Agency Guide" as fetched July 12, 2026 (document last modified by its author roughly nine hours earlier). This is a reference copy only: the source of truth remains the Google Doc, the outline is unadopted, and its wording, including its typos, is preserved verbatim on purpose; the cleanup list lives in the INS-301 comparison memo (07_BUILDLOG). Page-number columns from the original are omitted.

Cover

PUBLICATION INS-301. PARTICIPATING PUBLIC AGENCY GUIDE. City, County, Joint Powers Authority. Prepared by HGF Management Company, Program Administrator. CALIFORNIA LAND-SECURED FINANCING PLATFORM.

Table of Consents (as titled)

Body as drafted (chapters 1 through 5 are topic skeletons)

Chapter 1: 1.1 Purpose of this Guide, who this manual is for and how to use it. 1.2 What is INSITE, a concise explanation: what INSITE finances, who participates, high-level workflow, public/private partnership, one-page overview, the "elevator pitch." 1.3 Intended Users, discussing the California housing shortage, small builders underserved, upfront impact fees, the existing financing gap, why traditional CFD programs don't work well for small projects, the business case. 1.4 How INSITE fits within California Public Finance: "This This combines" how INSITE complements SCIP, complements BOLD, relationship to traditional CFDs and assessment districts. 1.5 Why Public Agencies Participate: encourages housing production, receives fees sooner, no General Fund risk, minimal staff time, professional administration, standardized documents, lower developer financing costs.

Chapter 2 lists objectives, eligible public agencies, eligible development projects, eligible public improvements, eligible development fees, program participants, program benefits. Chapter 3 in the body runs: 3.1 Benefits to Cities (accelerated housing, fee collection, reduced staff workload, professional administration); 3.2 Counties; 3.3 School Districts; 3.4 Special Districts; 3.5 Joint Powers Authorities; 3.6 Small to Mid Size Developers; 3.7 Homeowners; 3.8 Community. Chapter 4 in the body is titled How INSITE Works and runs eleven steps: Developer Application, Eligibility Review, Fee Verification, Improvement Verification, Appraisal, Underwriting, Annexation, Funding, Construction, Annual Administration, Future Bond Refinancing. Chapter 5 lists the participation public agency, joint powers authority, INSITE program administrator, and the division of responsibilities.

Chapter 6, Legal and Financing Structure (the drafted chapter)

6.1 INSITE Community Facilities District (CFD) Program. Purpose of the INSITE CFD; establishment of a single, ongoing CFD by each participating City or County; the INSITE financing platform; one district serving multiple development projects; Future Annexation Area; long-term program administration; relationships among the CFD, INSITE, developers, and participating public agencies. Key concept: unlike traditional land-secured financings created for a single project, the INSITE Program establishes a long-term Community Facilities District designed to serve multiple qualifying development projects over many years through voluntary annexations. Figure 6-1 diagrams: Participating City/County, into the INSITE CFD (Future Annexation Area), into Projects A through D (formation then annexations), into Credit Facility Advances for each project, into Annual Special Tax Administration, into Optional Portfolio Bond Refinancing, and the program continues as new projects annex.

6.2 Community Facilities District Formation. Initial developer participation, formation proceedings, formation resolutions, public hearings, election proceedings, formation documents, Future Annexation Area, recording the Notice of Special Tax Lien, program activation.

6.3 Future Annexations. Voluntary annexations, future developer participation, property owner consent, annexation procedures, project qualification, appraisal requirements, underwriting review, approval process, recording annexations, continuing expansion. Key concept: the INSITE CFD remains open for future qualifying projects, which annex into the existing district rather than forming new CFDs.

6.4 Rate and Method of Apportionment. Purpose of the RMA, standard INSITE methodology, allocation of Special Taxes, Maximum Special Tax, annual escalation provisions, Backup Special Tax, prepayment methodology, treatment of future annexations, administrative flexibility.

6.5 Eligible Financing Costs. Development impact fees, school fees, utility connection fees, capacity charges, public infrastructure, public improvements, formation costs, financing costs, capitalized interest, reserve requirements if applicable, other eligible public costs.

6.6 INSITE Financing Platform. Capital sources: private placement financing, institutional investors, commercial banks, warehouse credit facilities, private credit funds, direct lending relationships. Credit facility: revolving credit facility, warehouse line of credit, draw requests, funding approvals, advance procedures, portfolio management. Security structure: the Community Facilities District, Special Tax Lien, Funding Agreement, Credit Agreement, assignment of financing documents, security interests. Cash flow: developer funding request, INSITE approval, credit facility advance, payment of eligible public costs, repayment through annual Special Taxes. Advantages: immediate access to capital, no waiting for a bond sale, faster project funding, lower transaction costs, financing available for smaller projects, flexible funding as projects are approved, continuous financing through future annexations. Transition to permanent financing: portfolio stabilization, evaluation of refinancing opportunities, optional tax-exempt bond refinancing, the program continues after refinancing, future annexations continue without interruption.

6.7 Funding and Financing Agreements. Funding Agreement, Acquisition Agreement, Reimbursement Agreement, disbursement procedures, developer obligations, conditions to funding, default provisions, administrative requirements.

6.8 Optional Bond Refinancing. Portfolio stabilization, refinancing objectives, pooled bond refinancings, stand-alone bond financings, private placements, public offerings, continuing disclosure, ongoing administration. Key concept: bond financing is not required for the operation of the INSITE Program; the refinancing decision follows market conditions, portfolio characteristics, and the best interests of participating public agencies and developers, and annexations continue regardless.

Chapters 7 through 10 and appendices

Header-only in the draft, matching the contents listing above.
