

INS-303 · INVESTOR GUIDE OUTLINE · VERSION 0.1

Chapter plan with the public-versus-portal split, ready for the founder's edits | HGF Management Company | July 12, 2026

Version 0.1, July 12, 2026. The chapter plan for the capital-markets manual, built from the founder's July 12 notes, with each chapter mapped to its existing source material and designated PUBLIC (open website) or PORTAL (secure, credentialed). The founder's notes correctly observe that this outline decides the public-versus-portal split; here is that decision, chapter by chapter, ready for his edits.

The pipeline in one sentence

Origination writes privately placed, tax-secured notes one project at a time; a revolving warehouse credit facility carries the growing portfolio; and pooled tax-exempt bonds provide the optional permanent take-out once the portfolio stabilizes. The program's existing documents describe the origination layer; this manual adds the layers above it.

Chapter plan

- 1. Executive overview.** PUBLIC. Source: whitepaper sections 1 through 3, capital partner brief. Status: exists, needs assembly.
- 2. Capital structure.** PUBLIC summary, PORTAL detail. Source: whitepaper section 4 plus the founder's notes; the facility and take-out layers are new writing. Status: half exists.
- 3. Funding flow, origination to permanent.** PUBLIC diagram, PORTAL mechanics. Note origination, warehouse advances, draw conditions, private placement program, bond take-out triggers. Source: founder's notes; new writing gated on Build Log question 10's one-word confirmation. Status: new.
- 4. Credit enhancements and collateral.** PORTAL. Source: founder's notes; new writing with bond counsel input. Status: new.
- 5. Security interests and the cash-flow waterfall.** PUBLIC principles (lien standing, zone isolation, four-to-one policy), PORTAL waterfall detail. Source: whitepaper section 5, capital brief security stack; waterfall is new. Status: half exists.
- 6. Underwriting and risk management.** PUBLIC. Source: whitepaper sections 5 and 10, appraisal manual INS-101, Kill Memo. Status: exists, needs assembly.
- 7. Servicing and administration.** PUBLIC summary, PORTAL service-level detail. Source: operations manuals INS-501 and INS-401. Status: exists.
- 8. Financial and investor reporting.** PORTAL. Reporting calendar, portfolio tape format, delinquency reporting, continuing disclosure. Source: new writing; INS-501 provides the raw administration facts. Status: new.
- 9. Bank and investor FAQ.** PUBLIC. Source: new writing from the claims register; every answer carries its citation. Status: new.
- 10. Marketing surfaces and the portal.** The public half is live today: capital partner brief, stakeholder deck, program website with calculator, and the new tax-equivalent yield calculator. The portal half holds chapters 3 through 5 detail, chapter 8 entirely, deal-level documents, and the data room. Status: public half exists; portal is a build decision after this outline is approved.

What unblocks the full manual

One word from the founder on question 10 (the pipeline reading above), his edits to this chapter plan, and bond counsel's engagement for chapters 4 and 5. Nothing else is missing; roughly 60 percent of the content already exists in the whitepaper spine and gets assembled, not rewritten.

INSITE™ is a pre-launch program concept administered by HGF Management Company. This material is not an offer of financing, legal advice, or investment advice. Program structure, eligibility, costs, and pricing are subject to issuer approval, bond counsel review, and program underwriting. Figures identified as targets or estimates are the founder's working numbers, not commitments.
