

Delivery Memorandum

Milestones 2 and 3 | Professional Services Agreement | July 16, 2026

Prepared for Dennis Lanni, HGF Management Company

Date of delivery: July 16, 2026

Reference: Professional Services Agreement, HGF Management Company, redline transmitted July 16, 2026

Purpose of this memorandum

This memorandum transmits the completed deliverables under Milestone 2 and Milestone 3 of the Professional Services Agreement and records the date of delivery in writing. Under the agreement, each milestone deliverable is deemed accepted if HGF provides no written response within five calendar days of delivery, and payment is due within ten business days after acceptance. Because the agreement has not yet been executed, the acceptance period for the deliverables listed here begins on the date the agreement is signed by both parties or on the date of this memorandum, whichever is later. Everything listed below is provided both as attached files and as live links so that it reaches HGF in accessible and usable format.

Milestone 2: Developer Platform and Developer Guide

The Developer Guide and Manual is delivered as INS-302, version 1.0, in both PDF and Word editions. The guide covers eligibility, the application and data package, underwriting, financing approval and annexation, funding mechanics and costs, the construction period, home sales and buyer disclosure, and a developer FAQ. One addition remains in progress: a short chapter on ongoing administration covering the annual levy from the developer's perspective, which will be delivered as version 1.1 within the milestone period at no change to scope or price.

The Online Fee Estimator is delivered as a working browser tool. It accepts project information and produces an estimate of development impact fees and potential INSITE financing. It was tested on July 13, 2026 at desktop and mobile widths with real and invalid inputs and produced no errors. The live link is https://raw.githack.com/Obviouslyobvi/Insite/master/05_WEBSITE/fee_estimator.html and the source file accompanies this memorandum.

The initial build of the statewide fee database is delivered as a structured database kit consisting of the database template and its accompanying documentation, with the legal basis for collection verified against Government Code section 65940.1, which requires cities and counties to post their fee schedules online. Population of the database begins with the pilot jurisdiction and proceeds statewide. Migration of the template into Airtable awaits creation of the HGF Airtable account, since platform fees are borne by HGF under the agreement.

Milestone 3: Capital Markets Platform and Investor Guide

The Investor Guide and Manual is delivered as INS-303, version 1.0, in both PDF and Word editions. The guide runs ten chapters across four parts and covers all five required subject areas: capital structure, funding flow from origination to permanent financing, the warehouse credit facility, the pooled bond take-out strategy, and underwriting and risk management. Two sections are intentionally reserved pending bond counsel review: Chapter 4 on credit enhancements and section 5.5 on the cash flow waterfall. These are marked as counsel gates inside the document because completing them before counsel opines would require inventing terms that counsel must set. Acceptance of this deliverable with those two sections reserved is requested; they will be completed at no additional charge once bond counsel provides the required determinations.

Investor marketing material is delivered as the Capital Partner Brief in PDF, with the live browser edition at https://raw.githack.com/Obviouslyobvi/Insite/master/03_MARKETING/src/INSITE_Capital_Partner_Brief.html.

The investor tool is delivered as the Tax-Equivalent Yield Calculator, a working browser tool tested on July 13, 2026 with no errors and arithmetic spot-checked. One provenance note requires a written response: the agreement describes this deliverable as an integration and refinement of the calculator from the founder's Lovable build, but that build could not be located in the shared Drive, so the delivered calculator is an original build. If the Lovable version can be provided, its features will be merged; otherwise written acceptance of the delivered calculator as satisfying this line item is requested. The live link is https://raw.githack.com/Obviouslyobvi/Insite/master/05_WEBSITE/tey_calculator.html and the source file accompanies this memorandum.

The secure investor portal remains open under this milestone. The public-versus-portal split for every chapter of the Investor Guide is already marked inside INS-303 and awaits the founder's approval of that split, after which the portal build proceeds. Hosting and platform costs for the portal are borne by HGF under the agreement.

Reference material accompanying this delivery

The Participating Public Agency Guide draft, INS-301 version 0.99, accompanies this delivery as reference material. It was prepared before the date of the Professional Services Agreement and is provided to support the founder's authorship of that guide, which the agreement assigns to HGF with review and comment support from the contractor.

Items awaited from HGF

Written acceptance or written response on each Milestone 2 and Milestone 3 deliverable within the acceptance period. The founder's decision on the Lovable calculator provenance question stated above. The founder's approval of the public-versus-portal split in INS-303. Creation of the HGF Airtable account for the fee database migration. The founder's edits, if any, to the INS-303 chapter plan.

INSITE™ is a pre-launch program concept administered by HGF Management Company. This material is not an offer of financing, legal advice, or investment advice. Program structure, eligibility, costs, and pricing are subject to issuer approval, bond counsel review, and program underwriting. Figures identified as targets or estimates are the founder's working numbers, not commitments.
