

INS-002 · PRE-BUILD BRIEF

Defaults, caveats, and needs behind the Program Whitepaper. Read before the whitepaper. | HGF Management Company | July 10, 2026

Read this first: the defaults, caveats, and needs behind the Program Whitepaper.

Prepared for Dennis Lanni | HGF Management Company | July 10, 2026

What is being built

INS-002, the Program Whitepaper: the flagship document that explains the entire program to a serious reader (a city finance director, a banker, a bond attorney, a sophisticated developer). Three files: a formatted PDF for presenting, an editable Word copy for Dennis's redlines, and the markdown source the build maintains.

Defaults applied, because the question batch is still open

1. **Built fresh, not salvaged.** The quarantined draft found during verification is ignored. If Dennis prefers salvage, this fresh version becomes the benchmark to compare against, so nothing is wasted.
2. **The word "School" is dropped from the program name.** It reads "INSITE Development Impact Fee Financing Program" throughout. School fees appear once, explicitly excluded at launch. One find-and-replace restores the word if Dennis overrules.
3. **The pilot is described generically:** a small finished-lot subdivision in the Sacramento area. No lot count, no city name, no dates, until Dennis clears specifics.
4. **The company is HGF Management Company** everywhere. If a new legal entity is chosen, it is one swap and a rebuild.
5. **Consultant seats are labeled "selection in progress."** No firm names appear until Dennis picks them.

Caveats a reader will see stated inside the document

- Every rate, cost, and minimum is labeled a founder target or estimate. No term sheet exists and the paper says so.
- The market size shows its arithmetic and its \$25,000-per-unit assumption in plain view.
- SCIP and BOLD are named and credited. The paper claims a differentiated operating model, never a first-ever mechanism.
- The paper is marked pre-launch draft, not an offer of financing, and subject to bond counsel review before any external use.

What Dennis must supply to move this from draft v1.0 to a releasable v1.1

The name decision (trademark clearance or a backup name), the entity decision, the three consultant selections, pilot specificity permission, and a bond counsel read-through. None of these block today's build; all of them gate external release.

Known limits of v1.0

No city-specific fee schedules are quoted (they vary by jurisdiction and change; the document points readers to posted schedules instead). No interest rate is promised. No legal conclusions are drawn; statutes are cited for what they say, and structuring calls are flagged for counsel.

INSITE™ is a pre-launch program concept administered by HGF Management Company. Internal planning material. Not an offer of financing, legal advice, or investment advice.
